

GRIPPS®

H01064 COIL E-TETHER WITH STEEL CLAMP & E-CATCH

The GRIPPS® Coil E-Tether with Steel Clamp & E-Catch features a strong steel clasp connected to an industrial-grade PU coil that creates a tether suitable for securing small electronic devices in harsh work environments.

This tether securely clamps onto materials with a thickness exceeding 3mm/0.1", such as pocket liners or shirt collars.

Featuring a side-release attachment dock equipped with a simple choking mechanism, it enables effortless swapping of electronic devices. This provides a swift and reliable solution for tethering cameras, cell phones, radios, and other small items with suitable existing loops or hang holes.

KEY FEATURES

HOW TO USE

1

Peel the cover from one side of the adhesive pad and attach to the E-Catch. Peel the cover from other side and attach to a non-porous location on the device.

2

Secure the Coil E-Tether to the E-Catch by first feeding the loop through the connection point, then feed the Coil E-Tether back through the loop to create a choke.

Press the side-release buttons to hot-swap between different electronic devices. Ensure the attachment dock 'clicks' back into place.

3

If anchoring to clothing, ensure you clip the Coil E-Tether onto thick fabric such as your collar or pocket lining.

SPECIFICATIONS / VARIANTS

SKU	MAX LOAD	MIN LENGTH	MAX LENGTH	VARIANT
H01064	0.5KG 1.1LB	18CM 7IN	86CM 34IN	With E-Catch
