H02039P PHONE GRIPPER WITH COIL TETHER

0.3^{KG} 0.6^{LB}

MAX LOAD

Tether your phone or mobile device without needing a permanent or semi-permanent connection point. Used in conjunction with a load rated tether, the GRIPPS® Phone Gripper and GRIPPS® Tablet Gripper use purpose-built silicon to create a load-rated tethering solution with zero impact on device operation.

Unlike traditional methods that involve applying strong adhesives directly to your mobile device, which can damage its finish upon removal, the GRIPPS® Phone Gripper offers a flexible design.

This design enables you to tether your mobile device "on-demand," granting you the freedom to use your device without constraints when working at height.

Bundle the GRIPPS® Phone Gripper with the GRIPPS® Coil Hard Hat Tether.

ENGINEERED FOR DROP PREVENTION

GRIPPS.COM

KEY FEATURES

Custom silicon compound made for strength and grip.

Avoids installing a permanent connector point on a mobile device.

No additional adhesives required.

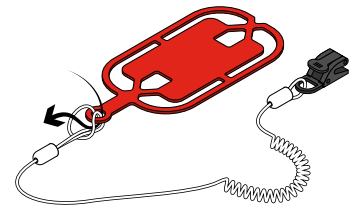

Compatible with the GRIPPS® Coil Hard Hat Tether.

Integrated, load-rated tether connection eyelet.

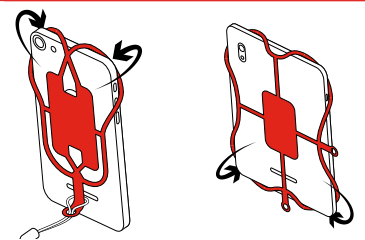

HOW TO USE

1

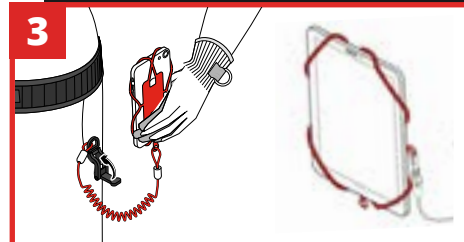

Pass cord through the eyelet of the Phone Gripper and weave it back through its own loop to create a choke-hold. Pull tight.

2

Pull all four corners of the Phone Gripper endings over the corners of your device to the front side. Ensure all corners are firmly applied and the Phone Gripper has a snug fit over device.

3

Apply the clip of the coil tether to your clothing by sliding the clip over the garment and snapping shut the clip. Ensure the clip is closed correctly by testing, firmly pull-on tether to check for a secure hold.
