GRIPPGRID 750GSM ANTI-SLIP FR GRID MESH MATTING

Engineered for safety at heights, GrippGrid 750gsm Anti-Slip FR Grid Mesh Matting delivers superior drop prevention for grid mesh platforms.

This matting is crafted from high-quality polyester with a durable PVC coating, ensuring both fire retardancy (BS 7837 certified) and high UV resistance. Its anti-slip surface is suitable for high-traffic areas, making it ideal for repeated use across multiple job sites.

GrippGrid is easy to install, compact when rolled, and can be fastened securely with GrippClips or zip ties. Available in three sizes, it offers a flexible, economical, and compliant solution for elevated work environments.

ENGINEERED FOR DROP PREVENTION

KEY FEATURES

Anti-Slip Surface:

Engineered anti-slip material provides a secure footing for workers, even in high-traffic areas.

Fire Retardant:

Certified to BS 7837, making it suitable for projects with strict fire safety requirements.

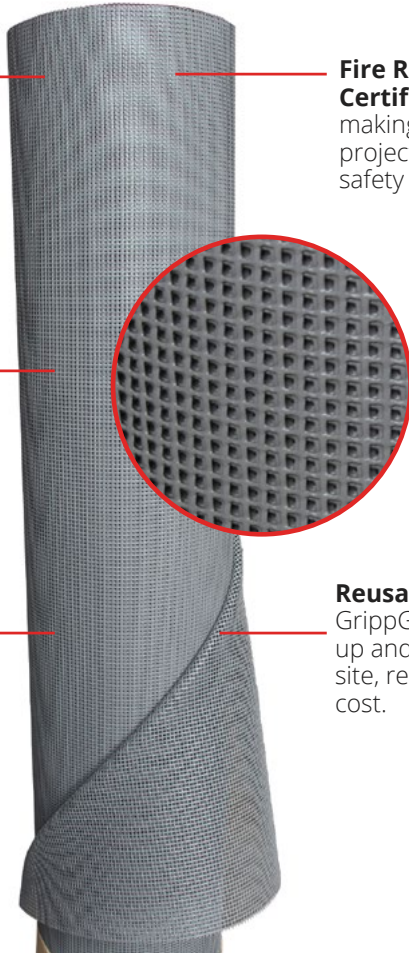

High UV-resistance.

Easy Installation:

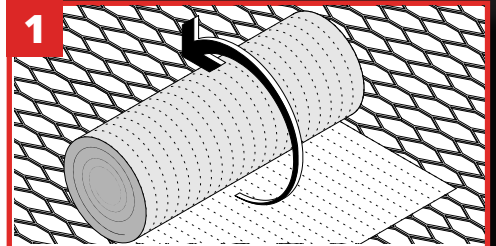

Simple to roll out and fasten with GrippClips or ties, and just as easy to remove and store.

Reusable and Portable:

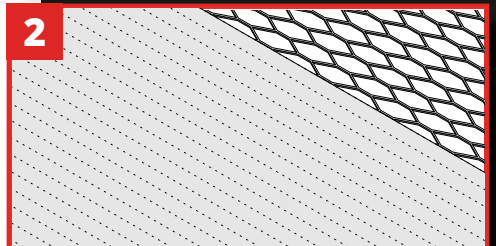

GrippGrid can be rolled up and reused from site to site, reducing waste and cost.

HOW TO USE

Place roll of GrippGrid on gridmesh floor in the desired location. Roll out the matting ensuring material is flat without kinks.

Fasten GrippGrid with GRIPPS® GrippClips, zip ties (or similar) in corners and along edging. Remove GrippClips/ties and roll back up for re-use when finished.
