COMPLIANT

H01021 SWIVEL CATCH

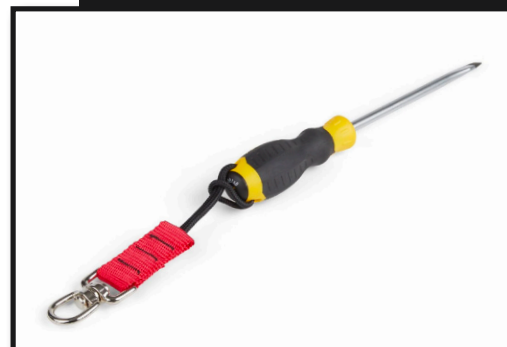

2.5 KG 5.5 LB

MAX LOAD

The GRIPPS® Swivel Catch effectively prevents tangling while working with hand tools at height. The load-rated swivel point enables a 360-degree range of motion, while the cord loop offers a convenient choke that securely attaches to your tool's existing hang-hole, slot, or closed handle.

Secure your tool by attached a GRIPPS® tool tether or coil to the metal ring of the GRIPPS® Swivel Catch, then anchor it to your glove, belt, or another suitable connection point.

Sold in 5-packs and 10-packs.

ENGINEERED FOR DROP PREVENTION

GRIPPS.COM

KEY FEATURES

Quick, easy installation with no special tools or equipment required.

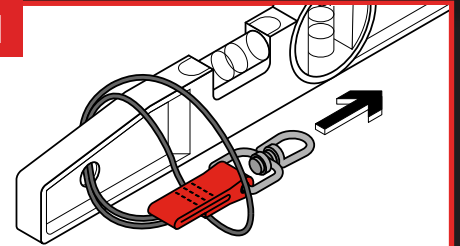

Fully certified and load-rated.

Swivel anchor allowing for full 360-degree range of movement without getting tangled.

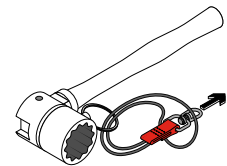

HOW TO USE

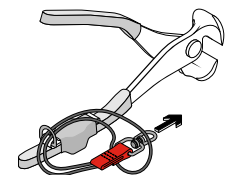

1

Feed the Swivel Catch through the pre-formed hole in the tool. Loop the Swivel Catch back through itself. Your tool is now ready to be attached to a GRIPPS® Tool Belt using a GRIPPS® Retractor Unit.
