H02047 SCAFFOLD KEY HOLSTER

Designed specifically for use at elevated heights, the GRIPPS® Scaffold Key Holster ensures the secure and convenient storage of your scaffold key.

Its lightweight yet durable industrial-grade design incorporates a Velcro flap to safeguard the keys during tasks performed at height.

Additionally, load-rated D-rings are integrated to serve as anchor points for tethering the scaffold key, further enhancing safety measures.

HOW TO USE

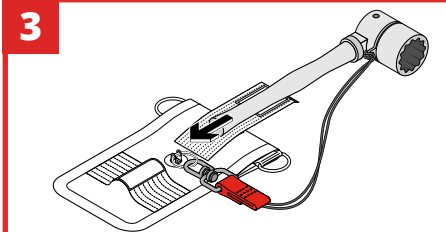

KEY FEATURES

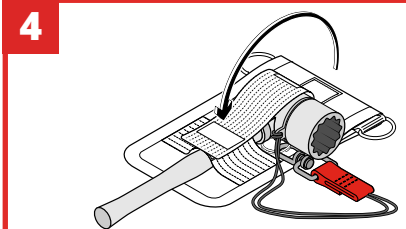

1 Remove tool ring from the retractor unit then insert into back pouch of holster. Reattach the tool ring, keeping the ring exposed outside the front of the holster.

2 Connect the tool to the retractor or side D-rings.

3 Slide the tool into holster with the connection point applied to tool.

4 Close the front strap.

5 Apply the holster to your work belt, by sliding the belt through the slip located on the upper end of holster.
