H01135 LOCKJAW CLIMBERS BAG - 10KG/22LB

10 KG

22 LB

MAX LOAD

Durable, lightweight, and equipped with multiple tether anchor points, the GRIPPS® Lockjaw Climbers Bag keeps tools securely tethered and easily accessible—both inside and out.

A reliable zip closure ensures the safety and security of contents during transportation, while an integrated metal-snap mechanism keeps the bag open and the contents readily available when in use on the job.

Inside the bag, heavy-duty tether anchors complement an array of external tether anchor points, guaranteeing that tools remain tethered throughout all stages of the job.

Additionally, inner sleeves help organise tools within the bag for efficient storage.

KEY FEATURES

Heavy-Duty Tether Anchors

Built-in anchor points inside and outside the bag for secure tool attachment and drop prevention.

Metal Snap Mechanism

The metal snap mechanism holds the bag open for easy access or snaps the bag shut for security.

Heavy-Duty Zip Closure

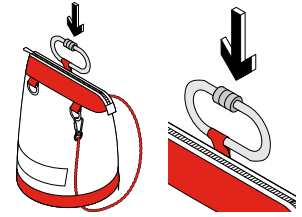

Secure zip closure for security against contents falling out.

Inner Pockets for Organisation

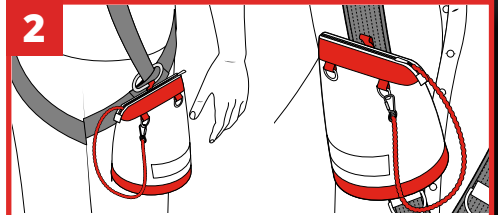

Dedicated compartments to keep tools organised and easily accessible.

1

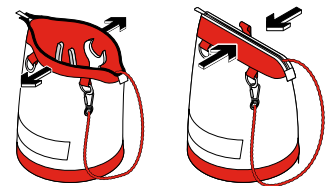

To connect a Lockjaw Climbers Bag for personal use, feed a carabiner through one of the two upper loops.

2

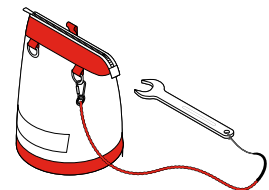

Connect the carabiner to an appropriate anchor point on the harness.

3

To operate the metal-snap mechanism, pull the opening apart and the closure will automatically spring open and lock into place.

4

Ensure that the closure is zipped closed when not in use to prevent spills. Only tether via the dedicated D-rings.

*** NEVER EXCEED MAXIMUM LOAD ***

SPECIFICATIONS

SKU	MAX LOAD (LIFTING)	MAX LOAD (D-RINGS)	HEIGHT	DIAMETER
H01135	10kg 22lb	2.5kg 5.5lb	38cm 15in	20cm 7.9in
