H01010 V-GRIPP TAPE

Utilising innovative self-vulcanising technology, GRIPPS® V-Gripp Tape establishes a load-rated tool connection point without the need for adhesives.

Compatible with the GRIPPS® Tool Catch and GRIPPS® Tool Hitch range, this tape offers effortless application, bonding instantly upon contact with itself.

Engineered to withstand heat, water, and oil, GRIPPS® V-Gripp Tape delivers exceptional durability, making it an ideal choice for on-site and extreme working environments.

HOW TO USE

1

Place Tool Catch with metal ring facing away from the tool's center of gravity, white tag facing up.

2

Wrap the GRIPPS® V-Grip Tape around the tool 10 x while stretching the tape to activate the self-vulcanising feature, creating a secure connection. Ensure the raised catch is not covered by the tape. Pull on the Tool Catch with force to test application.

3

Your Tool Catch is now ready to be connected with a suitable GRIPPS® tool tether using the D-ring.
